

SUMMARY

AI Engineer | Data Scientist

Passionate about building ethical, scalable AI systems for real-world impact in Africa. Strong foundation in machine learning, NLP, and web technologies.

EDUCATION

Master of Science in Engineering AI — Carnegie Mellon University Africa

Aug 2025 – May 2027

Bachelor’s Degree in Artificial Intelligence — African Development University, Niger

Oct 2021 – Jun 2024

Capstone: AI-driven Financial Assessment Project

EXPERIENCE

It Operations Intern

July 2025 - August 2025

Airtel Niger, Niamey Niger

- Supported large-scale data backup and recovery operations across multiple sites, ensuring data integrity at the main datacenter.
- Built a retrieval-augmented generation (RAG) chatbot using internal Airtel documentation for service queries.

Web Developer | AI Engineer

August 2024 - August 2025

Yayi-Make, Niger, Niamey

- Developed and maintained web applications using HTML, CSS, JavaScript, and React.
- Integrated machine learning, computer vision, and third-party APIs across three production projects.
- Built analytics dashboards and worked with deep learning models for medical AI applications.

SKILLS & CERTIFICATIONS

Machine Learning, Python, JavaScript, Web Development, Artificial Intelligence, Networking, Software Development

Certifications: IBM ML with Python; NLP (UC Irvine); Computer Vision (Google Cloud); AWS Cloud Essentials; Cybersecurity & IoT (KSU)

Languages: English (Native), French (Working Proficiency)

PROJECTS

Project SpearPhish – Multi-Stage Phishing Detection System

October 2025 - December 2025

- Designed a novel 3-layer detection system combining NLP for email text and dynamic web scraping for URL behavior analysis.
- Engineered a custom data pipeline to harvest 2,000+ live phishing URLs, solving critical "link rot" issues in historical datasets.
- Built ML models (Logistic Regression, XGBoost) achieving 96% F1-score (text) and 80% accuracy (structural), deployed via FastAPI and Next.js.

Finvue - Ethical Financial Risk Analysis Using AI

January 2024 - June 2024

- Built an end-to-end web application for fraud detection and bankruptcy risk forecasting using four machine learning models.
